

## SPECIALTY MECHANICAL SERVICES

### For refining, petrochemical, power generation, midstream and heavy industrial companies and general contractors

Partners Specialties Inc. (PSI) provides comprehensive specialty mechanical services for a wide variety of industrial companies and general contractors. Our integrated approach expertly applies highly trained craftsmen and the latest technology to get the results you need.

PSI's skilled manpower availability and superior experience of craft personnel and supervision:

- Results in more efficient staff allocations to achieve goals
- Maintains greater continuity of field resources
- Reduces your safety exposure and risk

#### **Expert. Efficient. Economical.**

Headquartered in Houston, Texas, we stand ready to devise a unique specialty mechanical service solution for your group – whether your project needs involve a single site, or multiple sites scattered nationwide. Our services are available throughout the continental USA.

- High availability of skilled manpower
- The latest equipment and technology
- Responsive and efficient service

#### **Cross-trained, multi-craft technicians**

PSI field service technicians are trained and certified to perform:

- Hydraulic torqueing and tensioning
- Field machining and retubing
- Line isolation
- Tube plugging

#### **Turnkey specialty mechanical services**

We apply the right integration of our services, highly skilled craftsmen and specialized equipment.

- Field retubes to fin fans, condensers, exchangers and boilers
- Hydraulic torqueing and tensioning
- General field machining
- Repairs, testing, plugging and special isolations
- Code welding, R, S and U stamps

#### **Turnkey projects**

Our turnkey approach requires fewer resources, resulting in a more cost-effective, efficient and safe project environment.

- High pressure heat exchangers
- Fin-fan air coolers
- Surface condensers
- Critical/high-pressure flanges
- Reactors

#### **Supporting services**

In addition to our specialty mechanical services, we also offer:

- Field service pipe, structural & coded welding
- Shop fabrication of pipe spools, code vessels & components
- Design, fabrication & installation of pump bases
- Exchanger component repair
- Repairs to compressors, pumps, shafts & other reciprocating equipment

# PSI SPECIALTY MECHANICAL SERVICES

## Why should you consider PSI?

Because you need the most comprehensive expertise, safety and quality response for your group, whether you have one site or multiple sites. Because we integrate our specialty craft services to offer unique solutions tailored to your cost and quality requirements. And, because we augment our services with immediate access to the most diverse machine selection available plus the latest technology.

## A proactive approach to safety.

Our personnel and work processes are fully supported by comprehensive safety programs and policies that promote safety and health in every task our personnel undertake

for your project. Our Safety Committees are charged with anticipating safety issues, performing safety inspections and monitoring safety performance overall.

## A quality approach to customer satisfaction.

Our Quality Management System is based on industry best practices, standards such as ASME, NBIC, ANSI, API, customer requirements and our constant efforts to maintain the highest levels of quality in the marketplace. We are committed to achieving the complete satisfaction of our customers by maintaining the highest level of quality in the industry.
